

American Shelter: An Illustrated Encyclopedia of the American Home

Altogether 103 styles of American housing are featured in this book, spanning the earth lodge (circa 300) to the projected space unit (circa 2000). There are full diagrams, history, and a description for each of the Native American and settler homes, including the pueblo, longhouse, and wigwam; the log cabin, garrison house, and saltbox; and on through the Georgian, Greek Revival, false front, Queen Anne, and neomodern. Whether you're a student of architecture, a dabbler in design, a house-history buff or a novice home-buyer attempting to decipher your realtors' descriptions, Lester Walker's *American Shelter* has a lot to offer.
