

This paperback book contains Practices #13 and #14 in a series (of 14) titled One Stop LeaderShop – A Manager’s Guide to Business Operations. One Stop LeaderShop is a manager training program, designed to build marketable skills in the five leadership principles and fourteen business practices every manager needs to know. Whether you are a new manager or an experienced manager – or even an aspiring manager – the One Stop LeaderShop manager training program will teach you how to drive the performance of your team and your company. It will get you noticed. Stuff happens. People make mistakes. You can count on it. But smart managers are not the victims of potential risk. They are the champions of risk management. In In, you will develop a risk management vocabulary and you will learn how to pre-empt problems with a thoughtful set of checks and balances. Days that end badly for business operations almost always start out just fine. Outages – people or technology, local or regional, lasting hours or days – usually occur with no advance warning. In One Stop LeaderShop Practice 14: Business Continuity we remind you that life safety reigns as your single most important priority. Business resumption is a close (very close!) second. This Practice teaches the basics of disaster prevention, emergency preparedness, emergency response and, finally, long term recovery. The One Stop LeaderShop series is purposely designed as a self-directed manager training program. You decide when, where and how to study. Read it on your own or as part of a team. Either way, if you are interested learning new management skills or advancing the skills you already have, this program is perfect for you. Find this volume and the entire One Stop LeaderShop series in e-book format at Amazon.com. Also available on CD ROM is a companion collection of blank .doc and .xls templates referenced in all fourteen One Stop LeaderShop practices. Search One Stop LeaderShop Workbook. Turn your learning into action right away!
