

“A Cluster of Cancers: A Simple Coping Guide for Patients” brings a positive approach to the subject, showing how readers can participate in the healing process—alongside their treatments. It covers the gamut of self-help issues that cancer patients contend with (thirty-one subjects). Half of the quotes are by medical doctors and psychologists, while the other half are by experts in their fields or famous names. Supportive and encouraging, the practical suggestions provide a different slant from other cancer books as it is written by a cancer survivor.
