

Dedolica: A Study of Dorian Plastic Art in the Seventh Century BC

Originally published in 1936, this book examines the seventh-century Dorian art style known as Dedalim. In the first section, Jenkins outlines the four schools of Dedalic art and attempts an absolute chronology, and applies his conclusions to extant examples of stone sculpture from immediately before and after the Dedalic period. This book will be of value to Classicists and anyone with an interest in ancient art.
