

## No Boundaries: Moving Beyond Supply Chain Management

Technology Has Limits. Supply Chain Synthesis Has No Boundaries. So your company has jumped on the e-business train, and you're confident that the opportunities offered by technology are endless. But technology is limited, and your B2B and B2C strategies will only succeed if you understand and implement Supply Chain Synthesis (SCS). With SCS, there are new rules, no limits and no links. James A. Tompkins, Ph.D., a leading business consultant and speaker, asserts that SCS goes beyond Supply Chain Management (SCM) because it is a continuous improvement process of ensuring customer satisfaction from the original raw material provider to the ultimate, finished-product consumer. More simply put, SCS is the real B2B because it is conducting business with No Boundaries. No Boundaries: Moving Beyond Supply Chain Management is the latest book from Tompkins, the president and founder of Tompkins Associates, Inc., an internationally recognized consulting firm specializing in Total Operations. In this evolving age of e-, Fortune 500 companies seek the assistance of Tompkins in transforming their supply chains and business practices. Find out how to boost your customer satisfaction, strengthen your supply chain and rise to the top! Peppered with examples from Jim's wealth of experience, No Boundaries is the book for any organization that wants to excel in B2B.
