

Information and Communication Technology (ICT) in Banking Operations: An Evaluation of Recent Experiences in Nigeria

Information and Communication Technology (ICT) in Banking Operations provides a comprehensive evaluation of the response of banks to the adoption and implementation of innovative technologies. The book identified the ICT products in use in the banking industry and examined the factors that influenced their adoption with the aim of establishing their impact on banking structure and operations in Nigeria. Essentially, the book considered the need for a proper alignment of technology strategy with business strategy to remain competitive in the banking industry. It critically examined the impact of ICT on customer services, employees motivation and banks image. The study concluded that the adoption of ICT in banks had impact on the structure, content and quality of banking operations. Investment in information technology proved to be an important component in the overall strategy of banks as the rate of adoption of ICT continues to improve progressively in Nigeria.
