

The most important statements ever made on the right to bear arms, all in one powerful book. Proclaiming Liberty is the perfect reference book for gun rights authors, speakers, bloggers, and political activists -- and everyone interested in Second Amendment freedoms. The Web is littered with false or inaccurate quotations about the right to arms, and I felt the time had come to take out the trash, said author Philip Mulivor. I vetted more than 130 key quotes -- including nearly all the famous firearms-related remarks attributed to our Founders -- by checking them word-for-word against original books and manuscripts. Many of those sources predate the Declaration of Independence. The book debunks several phony quotes and sets the record straight on dozens of others. Included are reproductions of title pages from centuries-old books used in the authors research. To many readers, though, the real value of the book may be contained in the detailed citations for each quote. All citations appear in MLA format for the benefit of students. The right to keep and bear arms is Americas most important conversation, and historic quotes are a critical part of the gun rights dialogue. Proclaiming Liberty is a powerful tool for anyone who engages in that debate.
