

Stoner Meditation

Some advanced Stoners have achieved a low-level enlightenment (samadhi), but they discover that living in the non-ordinary world (stoned) is much different from the straight-ordinary world.

Many beginning Stoners are looking for the most effective ways to use psychedelics (including marijuana). And almost all trippers discover we have to compete with endless mind-chatter, and emotional overload during our Stoner experiences, and how difficult it is to trip without interruptions. And most of all, we psychonauts are curious why most of the wondrous insights disappear when we come down... With over 40 years of psychedelic experience that includes hundreds of lsd trips, we felt our writing this book could help demystify the entheogen path. Included in Stoner Meditation are detailed discussions on how to trip, meditate, and how to retain insights and stabilize our life-changing realizations. Weve also included exercises that can lead directly to transcendent experience, and some true stories. This is NOT a book on religion - Stoner Meditation demands that we take responsibility for our actions, and learn from direct experience. Psychedelics are our spiritual guides, and meditation brings clarity and balance of mind. Enter the wizard world where the combination of psychedelics and meditation creates profound awareness - Stoner Meditation. All profits, after expenses, are donated to charity.
