

The physiology of plants: A treatise upon the metabolism and sources of energy in plants,

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1900. Excerpt: ... INDEX Abies pectinata, nitrogenous compounds in, p. 458-Abrus precatorius, alkaloids of, 499. Absorption and excretion, 101.--and retention of salts by soil, 166.--, colouration and precipitation tests for, 98; hygroscopic, 161; mechanism of, 86; influence of stomata on abs. of carbon dioxide, 330; of fats, 100; of free nitrogen, 402; methods, 403; of dyes by living cells, 96; of light in deep water, 352; of water, 209; relation of, to transpiration, 227, sec 37;--appara-tus for, 232; influence of temperature on, 210; of neutral and poisonous gases on, 230; by subaerial organs, 158. Acacia, 238; A. lophanta, formation of asparagin by, 600. Accommodation, phenomena of, 21; to concentrated nutrient solutions, 139. Acer platanoides, 262, 265; A. pseudo-platanus, 282; A. saccharinum, bleed-ing of, 212. Acetamide, 383. Acetic fermentation, 559; influence of tem-perature on, 560. Acetic acid, nutritive value of, for fungi, 384. Acid reactions of sap and of protoplasm, 490. Acidity of tissues, 328. Acorus calamus, 156, 191. Acqua, formation of nucleus, 52, 53. Acrylcolloid, 70. Active albumin, 67-69. Acton, on nectar, 284; synthesis of carbo-hydrates, 325, 326; absorption of or-ganic food, 367. Adie, osmotic apparatus, 144. Adler, 202. Aeby, 396. Aeriferous system, in aquatic and terrestrial plants, 181; in swamp plants, 180; openings of, 188; pressure of air in, 182. Aerobes, 539, 540. Aerobic respiration, products of, 526; rela-tion to anaerobic, 547. Aesculus hippocastanum, 202, 324. Aethalium, i11; A. septicum, 377; analyses of, 67; corrosion of marble plates by, 173; production of ammonia by, 391-Agaricineae, asparagus in, 459. Agaricus, 368; A. campestris, mannite in,

476; A. muscarius, trehalose in, 476; A. oreades, evolution of prussic acid by, 391; A. o...
